

DISSERTATION ABSTRACT

The author constructs a model of the 'dual' economy in a descriptive-cum-planning

bottleneck. Otherwise, it will be allocated jointly in both the sectors. Proportion of allocation between agriculture and non-agriculture depends on the relative importance of each sector.

accumulation) in the advanced sector.

The paper concludes with a section entitled "OPTIMAL INVESTMENT AND QUALITY MONITORING" with particular reference to the "MARKETING AND BUSINESS PROGRAM" being adopted by central government of India. It also contains a section on the role of "FEDERAL OF THE INDIAN INSTITUTE OF MANAGEMENT CALICUTTA" which is mentioned in conclusion.
